INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference PC25571A FOR FUR		FOR FURTHER AC	ACTION See Form PCT/IPEA/416							
International application No. International filing of PCT/IB2005/000891 30.03.2005		International filing date 30.03.2005	(day/month/year)	Priority date (day/month/year) 07.04.2004						
International Patent Classification (IPC) or national classification and IPC C07D487/04, A61K31/519, A61P9/00										
Applicant PFIZER LIMITED										
 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. This REPORT consists of a total of 4 sheets, including this cover sheet. This report is also accompanied by ANNEXES, comprising: a. □ sent to the applicant and to the International Bureau) a total of sheets, as follows: □ sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the 										
 Administrative Instructions). sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)), containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). 										
4. This report contain	s indications rel	lating to the following it	ems:	*

PCT/IB2005/000891

Re Item V.

- 1 Reference is made to the following document:
 - D1: WO 01/18004 A (MERCI PATENT GMBH; JONAS, ROCHUS; EGGENWEILER, HANS-MICHAEL; SCHELLING) 15 March 2001 (2001-03-15)
 - D2: WO 02/00660 A (MERCI PATENT GMBH; JONAS, ROCHUS; SCHELLING, PIERRE; CHRISTADLER, MARI) 3 January 2002 (2002-01-03)
- 2. The present application discloses pyrazolo-pyrimidine derivatives which are useful as inhibitors of PDE5.

3. Novelty

The compounds of the present application differ from the compounds disclosed in D1 and D2 in the nature of the substituent on the bicyclic nucleus. Novelty is therefore acknowledged.

4. Inventive step

According to the Applicant (see page 2, lines 4-6), the problem underlying the present application resides in the provision of compounds which are potent inhibitors of PDE5 and have improved selectivity in vitro and/or an extended half-life in vivo. In view of the fact that the PDE5 inhibitors disclosed in the prior art D1 and D2 are structurally very similar, and that the prior art already explored a variety of different substituents on the heterocyclic ring without that the qualitative activity were affected, the provision of experimental data for the compounds of the present application showing the alleged improved activity over the known compounds is considered to be essential for the acknowledgement of an inventive step. In the absence of such data, no inventive step can yet be acknowledged.

5. Industrial applicability

Claims 18-20 are directed to a method for treatment of the human or animal body by therapy.
